In the first part of this volume the oxide hydrates including the hydroxides and hydroxide oxides of MOIII to MoV are described. (The anhydrous molybdenum oxides can be found in the volume "Molybdän" Erg.-Bd. B 1, 1975.) The compounds $\text{MoO} \cdot n\text{H}_2\text{O}$ with $n=1$ and 2 are investigated in detail. They are true oxide hydrates and not "molybdic acids". For completeness the hydrogen insertion compounds H with O.

Exam Success Guide Philippa Gardom Hulme 2021-06-10 The Cambridge International AS & A Level Chemistry Exam Success Guide brings clarity and focus to exam preparation, with detailed and practical guidance on raising attainment. The guide helps students to recap content through easy-to-digest chunks, apply knowledge with targeted revision activities, review and reflect on work done, and raise their grades with sample answers, examiner commentary and exam-style practice. The Cambridge International AS & A Level Chemistry Exam Success Guide is written by Philippa Gardom Hulme, an experienced author and former Chemistry teacher. Students can benefit from her vast experience and her commitment to doing all she can to support them in achieving their potential in exams. Other resources available include a Student Book which offers a rigorous yet accessible approach for covering the whole syllabus and an Enhanced Online Student Book which provides extra digital hotspots including downloadable questions and additional activities. These are also available in a great-value Print & Enhanced Online Student Book Pack.

Introduction to Chemistry, Laboratory

Manual T. R. Dickson 1994-12-23 Teaches chemistry by offering a dynamic, provocative and relevant view of the topic and its importance to society and our daily lives. Three themes are stressed throughout the text: developing chemical thinking and a chemical vision, learning problem-solving methods and utilizing group work and discussion activities. These themes involve and engage the students in their own learning processes—they are challenged to be active. The presentation of topics has been altered to include a new chapter which introduces the students to scientific thinking and shows that chemistry involves interesting and relevant topics. The reorganization presents many core concepts in the first five chapters, preparing students for later chapters. In addition, the author has added vignettes throughout the chapters referring to health, technology, the environment and society as well as to specific tools of direct use to students.
