Luz Debra Thomas 2020-06-09
Alma Cruz wishes her willful teenage daughter, Luz, could know the truth about her past, but there are things Luz can never know about the journey Alma took to the US to find her missing father. In 2000—three years after the disappearance of her father, who left Oaxaca to work on farms in California—Alma sets out on a perilous trek north with her

sister, Rosa. What happens once she reaches the US is a journey from despair to hope. Timeless in its depiction of the depths of family devotion and the blaze of first love, *Luz* conveys, with compassion and insight, the plight of those desperate to cross the US border.

Embracing Mathematics

Peter Appelbaum 2008-06-30
This alternative textbook for courses on teaching mathematics asks teachers and prospective teachers to reflect on their relationships with mathematics and how these relationships influence their teaching and the experiences of their students. Applicable to all levels of schooling, the book covers basic topics such as planning and assessment, classroom management, and organization of classroom experiences; it also introduces some novel approaches to teaching mathematics, such as psychoanalytic perspectives and post-modern conceptions of curriculum. Traditional methods-of-teaching issues are recast in a new discourse,

Singapore Literature and Culture Angelia Mui Cheng Poon
2017-03-03 Since the nation-state sprang into being in 1965, Singapore literature in English

has blossomed energetically, and yet there have been few books focusing on contextualizing and analyzing Singapore literature despite the increasing international attention garnered by Singaporean writers. This volume brings Anglophone Singapore literature to a wider global audience for the first time, embedding it more closely within literary developments worldwide. Drawing upon postcolonial studies, Singapore studies, and critical discussions in transnationalism and globalization, essays unearth and introduce neglected writers, cast new light on established writers, and examine texts in relation to their specific Singaporean local-historical contexts while also engaging with contemporary issues in Singapore society. Singaporean writers are producing work informed by debates and trends in queer studies, feminism, multiculturalism and social justice -- work which urgently calls for scholarly engagement.

This groundbreaking collection of essays aims to set new directions for further scholarship in this exciting and various body of writing from a place that, despite being just a small 'red dot' on the global map, has much to say to scholars and students worldwide interested in issues of nationalism, diaspora, cosmopolitanism, neoliberalism, immigration, urban space, as well as literary form and content. This book brings Singapore literature and literary criticism into greater global legibility and charts pathways for future developments.

Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems Laurent Perron 2008-05-20

The 5th International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems (CPAIOR 2008) was held in Paris, France May 20-23, 2008. The purpose of this conference series is to bring together researchers in the fields of constraint programming, artificial intelligence, and operations research to explore ways of solving large-scale, practical optimization problems through integration and hybridization of the fields' different techniques. Through the years, this research community is discovering that the fields have much in common, and there has been tremendous richness in

the resulting cross-fertilization of fields. This year, we allowed submissions of both long (15 page) and short (5 page) papers, with short papers either being original work, a reduced version of a long paper, or an extended abstract of work published elsewhere. We were not surprised by the 69 submissions in the long paper category: this is an active field with many researchers. We were surprised by the 61 short paper submissions. This was far more than predicted. With 130 high-quality submissions, competition for acceptance in this year's program was particularly fierce. In the end, we accepted 18 long papers and 22 short papers for presentation and publication in this volume.
