How to Tune and Modify Your Ford 5.0 Liter Mustang Steve Turner

Shelby Mustang Colin Comer 2019-09-17 Shelby Mustang details the entire story of these fantastic cars, from the early prototypes built in Shelby's Los Angeles shop to today's Ford-engineered high-tech performers. Written by one of the world's foremost authorities on Shelby automobiles, critically acclaimed author Colin Comer, and with a foreword by Lee Iacocca, the American automobile executive credited with the successful development of the Mustang, this is the definitive account of the Shelby. When Ford wanted to toughen up its super-successful new Mustang, they approached Carroll Shelby to give it the performance image it so sorely lacked. Beginning with a 1965 "K-Code" 289-cubic-inch-powered Mustang fastback, Shelby applied the same formula that had made his Cobra sports cars such devastating performers both on and off the track: more horsepower, less weight, balanced handling. The GT350 quickly established itself as a bonafide force in SCCA B-Production racing, twisting back roads, and boulevards alike—setting the course for future Shelby Mustangs, like the big-block GT500. Though those original Shelby Mustangs were done by 1970, Ford dusted off its Shelby relationship in 2006 and has been producing high-performance Ford Mustang Shelybs ever since. This is a must-have read for any fan of American performance cars, whether you're a muscle-era original or a 21st-century stormer.

Barbarossa and the Retreat to Moscow Artem Drabkin 2007-07-19 The onset of war in the summer of 1941 was a disaster for the Soviet Air Force. In a few weeks, faced by the onslaught of the Luftwaffe, most of the Soviet frontline aircraft were destroyed, and the casualty rate among the pilots was cripplingly high. Yet the surviving few gained precious battle experience and they formed the core of the fighter force that turned the tables on the Germans and eventually won air superiority over the Eastern Front. Many of these Soviet pilots are still alive today and in this book they vividly recall the air battles of 60 years ago.

Combined Army Operations at Brigade Level, Realistically Achieved Through Simulation I (COBRAS I) 1997 "This report presents the development of the U.S. Army's Force XXI Training Program's Combined Arms Operations at the Brigade Level, Realistically Achieved Through Simulation I (COBRAS I) training program for the brigade staff. The COBRAS I program provides structured, simulation-based training on basic staff skills for conventionally-equipped forces and consists of two types of exercises: a Brigade Staff Exercise for the brigade commander and his staff, and smaller Brigade Staff Vignettes for segments of the staff The report highlights the program's background and design efforts (e.g., task identification, scenario design), the construction of the training support package (TSP) materials, and the resulting exercises and TSPs; formative evaluation methods and results are included throughout this discussion. The report concludes with a discussion of lessons learned regarding future program development and an introduction to the COBRAS I follow-on effort (COBRAS II) that will enhance the capability of the program to satisfy the U.S. Army's training needs."--DTIC.

Road and Track 1990

Ah-1 Cobra Attack Helicopter Pilot's Flight Operating Instructions Headquarters Department of the Army 2011-05 During the Vietnam War fleets of transport helicopters provided U.S. forces with an unprecedented level of mobility and proved the concept of air cavalry . But without adequate support, helicopters such as the Bell UH-1 proved vulnerable to enemy ground fire. The solution was to develop a helicopter gunship. Bell s first foray into the category was rejected by the Army, but after Lockheed s AH-56 failed to meet critical goals, Bell answered the call with a new design. Equipped with a tandem cockpit, stub wings for weapons and a chin-mounted gun turret, Bell s Model 209 prototype was smaller and lighter than the AH-56, and used proven components from the UH-1. Developed in less than nine months, the 209 performed well and easily won the Army competition. In April 1966 the Army placed its first order for 110 aircraft, now designated the AH-1 Cobra or HueyCobra (but also widely known by the nickname Snake). Over 1100 would eventually be built, including twin-engine SeaCobra and SuperCobra versions for the Marine Corps. After entering service in June of 1967, Cobras provided extensive support in Vietnam as fire support platforms, and achieved over a million operational hours. Cobras also flew in Operation Desert Shield, Desert Storm and in Somalia before being retired in the late 1990s. They continue to fly for the Marine Corps, NATO allies and elsewhere. They also serve in a civil role as fire fighting helicopters. Created by Bell and the U.S. Army, this pilot s flight operating manual profiles the AH-1F Cobra. Over 300 pages long, this unclassified document is reprinted here in its entirety."

Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation III (COBRAS III) 1999 "This report presents the development of the U.S. Army's Force 21 Training Program's Combined Arms Operations at the Brigade Level, Realistically Achieved Through Simulation 2 (COBRAS 2) training program. The COBRAS 2 program extends prior training research, providing expanded structured, simulation based training for conventionally equipped brigade staffs. A Brigade Staff Exercise (BSE) for the brigade commander and staff represents one program component. This BSE succeeds the original (COBRAS 1) BSE by incorporating a wider audience. The second component is a set of brigade staff vignettes. It augments the COBRAS 1 vignette library by including training for brigade staff members and staff processes not covered in COBRAS 1 vignettes. This report describes the COBRAS 2 program background, design and development efforts, and the resulting exercises and training support packages. The report discusses lessons learned regarding future program development, and concludes with an introduction to the COBRAS 2 follow on effort that employs COBRAS 2 project and related research findings in the development and testing of logical next steps in Force 21 Training Program efforts." -- Stinet.
