Blason Poétique Alison Saunders 1981 This book - the first full-length study of the blason poétique examines the evolution of this French genre in the course of the sixteenth century, but also traces its earliest heraldic origins and indicates its subsequent development into the seventeenth century. The blason is treated in general but attention is concentrated particularly upon the anatomical blasons and contreblassons written by Clément Marot and his contemporaries in the 1530s and 1540s with a revaluation of their chronology in the light of hitherto «lost» editions, and an examination of the poems themselves and their debt both to the native French tradition and to Italian influences. Parallels are traced with contemporary illustrated verse, and the study attempts to demonstrate how - far from being an ephemeral eccentricity - the genre fits into the overall pattern of sixteenth-century French verse.

Art Nouveau Victor Arwas 2002 Rarely has a subject been served by a book of this stature. Five years in the making, it covers all aspects of Art Nouveau in France in 624 authoritative pages and 740 illustrations. Arwas traces the evolution of the movement as it developed, primarily in Nancy and Paris, with the help of carefully chosen illustrations, many never published before. Ranging from the 1900 Paris exhibition to paintings, graphics and posters and such collecting fields as furniture, jewellery, ceramics, book bindings and sculpture, the informative, witty text ranges over architecture, haute couture, and the role of women in Art Nouveau with a particular look at such theatrical icons as Sarah Bernhardt, Loïe Fuller and the *Grandes Horizontales*. Destined to become the standard book on the subject, both content and design will appeal widely to the connoisseur, the specialist and the collector, as well as to the novice who will be introduced to the magical wonders of the style.

"The Second Edition of Andy Field's *Discovering Statistics Using SPSS* is an excellent book and a valuable addition to the teaching of statistics in the behavioral sciences. The title of the book accurately reflects the approach taken. This is not simply a primer on how to use SPSS, but is a very good statistics text using SPSS as a vehicle for illustrating and expanding on the statistical content of the book. At the same time it also serves as a manual for SPSS, and has taught me things that I had not known about the software. I find this flexible approach to the blending of content and software to be an effective way of teaching the material. It is impossible to review this book without commenting on Andy's particular style. I enjoyed it immensely and think that it would appeal to both students and their instructors. It is refreshing to see someone who doesn't take himself too seriously." -- David C Howell, Professor Emeritus, University of Vermont

"Het is bijna onmogelijk om mee te maken hoe Alex voor Henry valt zonder zelf verliefd op hem te worden – op hen allebei, én op dit briljante, geweldige boek." van de Amerikaanse president, en Henry, Britse prins. Meteen zodra zijn moeder wordt verkozen tot president, wordt Alex Claremont-Diaz gebombardeerd tot Amerikaanse royalty: hij is knap, charismatisch en nog intelligent ook. Het publiek vreet hem op. Eén probleempje: Alex ligt in de clinch met een échte prins, Henry, aan de andere kant van de grote plas. En als de tabloids daar lucht van krijgen, worden Alex en Henry gedwongen om te doen alsof ze het goed hebben gemaakt. Maar wat begint als een nepvriendschap, groeit uit tot iets diepers en veel gevaarlijkers. Kan liefde de wereld redden? Ook als die liefde er anders uitziet dan verwacht? Casey McQuiston sleept je met 'Rood, wit en koningsblauw' mee in een verhaal vol humor en liefde.

Stability Analysis in Terms of Two Measures V.

Lakshmikantham 1993 The problems of modern society are both complex and multidisciplinary. In spite of the apparent diversity of problems, tools developed in one context are often adaptable to an entirely different situation. The concepts of Lyapunov stability have given rise to many new notions that are important in applications. Relative to each concept, there exists a sufficient literature parallel to Lyapunov's theory of stability. It is natural to ask whether we can find a notion and develop the corresponding theory which unifies and includes a variety of known concepts of

stability in a single set up. The answer is yes and it is the development of stability theory in terms of two measures. It is in this spirit the authors see the importance of the present monograph. Its aim is to present a systematic account of recent developments in the stability theory in terms of two distinct measures, describe the current state of the art, show the essential unity achieved by wealth of applications, and provide a unified general structure applicable to several nonlinear problems.

The Court Journal 1854

The Weary Sons of Freud Catherine Clément 1987 In this passionately written and controversial book, first published in 1978, Catherine Clément, Communist, feminist and analyst, asks what the social function of psychoanalysis should be and condemns what it has become. She attacks psychoanalysis as an institution disdainful of treatment and cure, serving the interests of a new intelligentsia, the nouveaux riches of a narcissistic literary culture and publishing industry. Contrasting the insights of psychoanalytic theory to the

obsessive imitations of Jacques Lacan by those who followed him as a practitioner-trainer, she offers an anthropological perspective and a political critique of Parisian psychoanalysis as a profession. How has the attentive ear of the analyst become deaf to questions about the social and political meaning of his or her work? Does a woman who is both a socialist and analyst necessarily hear such questions more clearly and answer them differently? Clement reflects on her own history, the history of psychoanalysis and the history of the French left to demonstrate what an activist and feminist restoration of psychoanalysis could be.

NW Zadie Smith 2012-10-04 NW: twee simpele letters, de postcode van een ogenschijnlijk doodgewone wijk in Londen. Wie in de jaren zeventig in die wijk in het sociale woonproject Caldwell opgroeide had maar één doel: er zo snel mogelijk zien weg te komen. Dertig jaar

later hebben de Caldwell-kinderen Leah, Natalie, Felix en Nathan ieder een eigen leven opgebouwd. Ze leven alle vier in een eigen wereld, terwijl ze in werkelijkheid slechts een paar straten van elkaar verwijderd zijn: het dilemma van de moderne stad, waar het normaal is je burens niet te kennen. Op een middag in april verschijnt er een vreemdeling aan de deur van Leah, die haar om hulp vraagt en haar dwingt om haar zelfgekozen isolement te verlaten. De stad van Leah, Natalie, Felix en Nathan is een ingewikkelde stad, even mooi als meedogenloos, waar de hoofdstraten in een woonwijk vaak benarde stegen aan het daglicht onttrekken, en waar een snelweg soms doodlopend kan zijn. In NW, haar nieuwe, briljante en tragikomische roman, weet Zadie Smith als geen ander het moderne levensgevoel, bekend bij stadsbewoners overal ter wereld, op een schrijnende, maar tegelijk hilarische wijze neer te zetten. Het is een roman die even sprankelend en vitaal is als de stad zelf. Zadie Smith (1975), geboren in Noordwest-Londen, is een van de belangrijkste schrijvers van de nieuwe Britse generatie. Voor haar lovend ontvangen romans Witte tanden, De handtekeningenman en Over schoonheid sleepte zij diverse prijzen in de wacht. 'Een hilarische en lyrische liefdesbrief aan Noordwest-Londen. NW is Zadie Smith in haar meest veelzijdige doorwroetheid. Het is bijzonder geestig en tegelijk heel macaber. Dit is een grootse roman.' the sunday telegraph 'Smith stelt in NW intelligente en indringende vragen over de immer groeiende kloof tussen arm en rijk, over schuld en verantwoordelijkheid, maar bovenal over de dagelijkse wreedheid van het moderne leven in de stad.' usa today 'Als lezers over honderd jaar willen begrijpen waartoe de Engelse roman in staat was, en wat het leven in Engeland werkelijk inhield, zullen ze NW ter hand nemen,

en erdoor gegrepen worden. nu is een vreugdevol, optimistisch, onstuimig meesterwerk; dit jaar zal er geen betere roman verschijnen, en volgend jaar vermoedelijk ook niet.' philip hensher, the daily telegraph

Arnhem Arnold D. Harvey 2001 In the late summer of 1944 two US and one British airborne divisions were landed, by parachute and glider, behind the German lines with orders to seize all the canal and river crossings between Eindhoven and Arnhem. Though most of the bridges were secured, the Allied plan was too ambitious. At Arnhem, the 'bridge too far', the British 1st Airborne Division was surrounded, cut off from all reinforcements and supply, and subjected to a week of artillery bombardment and infantry assaults spearheaded by tanks. Of over 10,000 airborne troops landed in the Arnhem sector, fewer than a quarter made it back to the Allied lines. In this new interpretation of the battle, A.D. Harvey uses German as well as British sources to show how the flaws in Allied planning combined with the unexpected vigour of German counter-measures to defeat an operation that many believed could have shortened the war by several months.

Downcast Eyes Martin Jay 1993 Long considered "the noblest of the senses," vision has increasingly come under critical scrutiny by a wide range of thinkers who question its dominance in Western culture. These critics of vision, especially prominent in twentieth-century France, have challenged its allegedly superior capacity to provide access to the world. They have also criticized its supposed complicity with political and social oppression through the promulgation of spectacle and surveillance. Martin Jay turns to this discourse surrounding vision and explores its often contradictory

implications in the work of such influential figures as Jean-Paul Sartre, Maurice Merleau-Ponty, Michel Foucault, Jacques Lacan, Louis Althusser, Guy Debord, Luce Irigaray, Emmanuel Levinas, and Jacques Derrida. Jay begins with a discussion of the theory of vision from Plato to Descartes, then considers its role in the French Enlightenment before turning to its status in the culture of modernity. From consideration of French Impressionism to analysis of Georges Bataille and the Surrealists, Roland Barthes's writings on photography, and the film theory of Christian Metz, Jay provides lucid and fair-minded accounts of thinkers and ideas widely known for their difficulty. His book examines the myriad links between the interrogation of vision and the pervasive antihumanist, antimodernist, and counter-enlightenment tenor of much recent French thought. Refusing, however, to defend the dominant visual order, he calls instead for a plurality of "scopic regimes." Certain to generate controversy and discussion throughout the humanities and social sciences, *Downcast Eyes* will consolidate Jay's reputation as one of today's premier cultural and intellectual historians.
