**Greed to Green** Charles

Derber 2015-11-17 This book shows how we can solve the climate change crisis, which is the greatest threat humanity has faced. Charles Derber, a prominent sociologist and political economist, shows that global warming is a symptom of deep pathologies in global capitalism. In conversational and passionate writing, Derber shows that climate change is capitalism's time bomb, certain to explode unless we rapidly transform our economy and create a new green American Dream Derber shows there is

hope in the financial meltdown and Great Recession we are now suffering. The economic crisis has raised deep questions about Wall Street and the US capitalist model. Derber systematically explores the causal links between capitalism and climate change, a taboo subject in the U.S, and opens up new thinking to solve both the economic and climate crises.

**Global Environment Outlook - GEO-6: Healthy Planet, Healthy People** UN

Environment 2019-05-31

Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide

governments, local authorities, businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO-6 outlines the current state of the environment, illustrates possible future environmental trends and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future - emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people. This title is also available as Open Access on Cambridge Core.
