Institutional Learning and Knowledge Transfer Across Epistemic Communities Elias

G. Carayannis 2011-11-25 Over the past several decades, as the pace of globalization has accelerated, operational issues of international coordination have often been overlooked. For example, the global financial crisis that began in 2007 is attributed, in part, to a lack of regulatory oversight. As a result, supranational organizations, such as the G-20, the World Bank, and the International Monetary Fund, have prioritized strengthening of the international financial architecture and providing opportunities for dialogue on national policies, international co-operation, and international financial institutions. Prevailing characteristics of the global economic systems, such as the increasing power of financial institutions, changes in the structure of global production, decline in the authority of nation-states over their national economy, and creation of global institutional setting, e.g., global governance have created the conditions for a naturally evolving process towards enabling national epistemic communities to create institutions that comply with global rules and regulations can control crises. In this context, transfer of technical knowledge from the larger organizations and its global epistemic communities to member communities is becoming a policy tool to "convince" participants in the international

system to have similar ideas about which rules will govern their mutual participation. In the realm of finance and banking regulation, the primary focus is on transfer of specialized and procedural knowledge in technical domains (such as accounting procedures, payment systems, and corporate governance principles), thereby promoting institutional learning at national and local levels. In this volume, the authors provide in-depth analysis of initiatives to demonstrate how this type of knowledge generated at the international organization level, is codified into global standards, and disseminated to members, particularly in the developing world, where the legal and regulatory infrastructure is often lacking. They argue that despite the challenges, when a country intends to join the global system, its institutions and economic structures need to move toward the global norms. In so doing, they shed new light on the dynamics of knowledge transfer, financial regulation, economic development, with particular respect to supporting global standards and avoiding future crises.

Managing Nonprofit Organizations Mary

Tschirhart 2012-07-10 MANAGING

NONPROFIT ORGANIZATIONS This essential resource offers an overall understanding of nonprofits based on both the academic literature and practitioner experience. It shows how to lead, manage, govern, and structure effective and ethical nonprofit organizations. *Managing Nonprofit Organizations* reveals what it takes to be entrepreneurial and collaborative, formulate successful strategies, assess performance, manage change, acquire resources, be a responsible financial steward, and design and implement solid marketing and communication plans. "*Managing Nonprofit Organizations* is the only introductory text on this subject that manages to do three critical things equally well: It's comprehensive, covering all the key topics leaders of NPOs need to know about; it's practical, providing lots of examples, case incidents, and experiential exercises that connect the content to the real world; and, best of all (and most unique compared to others), it's research-based, drawing on the latest and best empirical studies that look into what works and doesn't work in the world of nonprofit management." —Vic Murray, professor, School of Public Administration, University of Victoria "This book is a rarity—a text that can be used both as the focus for academic study and as a source of stimulating ideas for those practitioners who want to explore theories about management and how they can be applied so they can do a better job. Tschirhart and Bielefeld have explained all aspects of nonprofit management and leadership in a way that will stimulate as well as inform." —Richard Brewster, executive director, National Center on Nonprofit Enterprise, Virginia Tech University "*Managing Nonprofit Organizations* presents a comprehensive

treatment of this important topic. The book satisfies the competencies and curriculum guidelines developed by NASPAA and by NACC and would be ideal for instruction. The book maintains its commitment to informing management and leadership throughout the nonprofit sector." —Jeffrey L. Brudney, Albert A. Levin Chair of Urban Studies and Public Service, Cleveland State University "This is an important book, written by two of the leading scholars in the nonprofit studies field. Nonprofit managers, board members, funders, educators, and others will find *Managing Nonprofit Organizations* extremely valuable." —Michael O' Neill, professor of nonprofit management, University of San Francisco "Here's the book that my students have been asking for—just the right mix of theory presentation, research findings, and practical suggestions to serve the thoughtful nonprofit management practitioner. It will inform, instruct, and ultimately, inspire." —Rikki Abzug, professor of management, Anisfield School of Business, Ramapo College 'Making Sense' of Human Resource Management in China Malcolm Warner 2013-09-13 This edited work attempts to 'make sense' of recent developments in the field of Human Resource Management in the People's Republic of China. It attempts to see how the paradoxes and contradictions engendered by contemporary Chinese society are being resolved in the enterprises and workplaces of the Middle Kingdom. The book starts with an overview of the literature, then follows with a selection of micro-oriented, concerned with topics like recruitment and retention, then macro-oriented empirical studies, a number of the latter dealing with strategic as well as performance issues, with last, those comparing sets of societal cultural values. It attempts a synthesis of what has emerged from recent research on the 'harmonious society'. These contributions from authors based in universities in eight countries, in Australia, Canada, China, Hong Kong, Japan, Taiwan, United Kingdom and USA, cover a wide range of research on HRM, from the micro- to the macro-. Six of them teach

and/or research at campuses on the Mainland. Their empirical, field-based research covers the last half-decade and presents a robust picture of both what practitioners have adopted and how researchers have tried to 'make sense' of what they have investigated. This book was based on a special issue of Intl Journal of Human Resource Management.

Leading, Growing, and Sustaining God's Church Clarence Duff Ph.D. 2021-07-13 Focusing on what facilitates effective leadership, church growth, and retention, this book sets forth a process-oriented framework for understanding the dynamics of church growth and what works for and against it. The author, who is currently serving as the senior pastor of a local church in the City of Brampton, Ontario, for more than twenty years, highlights basic concepts and practices related to church leadership and growth. He considers questions such as: Why do some churches grow in numbers while others lag? What are the dynamic processes, strategies, and pathways that underlie effective leadership, church growth, and retention? How can the answers to these questions inform endeavors to increase and retain church membership? The author also asks if it's true that God is in partnership with his leaders, why are so many of our local churches not growing but declining? The world the church was established in more than two thousand years ago is not the world we live in today. Rethink what it means to lead, grow, and retain membership in a changing world with this important book.

conditions and needs for a broad range of skills and competencies, which include distinct needs for the client-consultant relationship, superior consulting/facilitation skills, an expertise in human and organizational systems, and, as emphasized in the volume, the masterful "use of self." As with our prior edited collection, this volume is a joint publication in the Research in Management Consulting and Contemporary Trends in Organization Development and Change book series. The dual focus is intended to reflect the importance of quality consulting for change across both the management consulting and Organization Development (OD) fields. It follows a long history of interest in how consulting affects organization change, what works, and, perhaps most importantly for generating theory and insight into the change process, why it works. The book contains fourteen chapters that frame the changing nature of the organizational change challenge, explore the use of self in intervening in organizations, and examine different change frameworks and perspectives, sharing various reflections and personal insights into the underlying challenges of consulting to bring about organizational change. Our underlying goal is to advance the theory and practice of effective organizational change consultation, stimulating thinking and discussion among change practitioners and researchers so that this work and profession continue to grow and evolve.

ENDORSEMENT: "Consultation for Organization Change Revisited offers a clear map of the dominant thinking about how consultants intervene to help organizations create an alternative future. It nicely answers the question of "What is Organization Development." It also has a memory so that you see the arc of the field over time, which gives an important perspective. Organization change is complicated work, this book makes it clearer." ~ Peter Block Author of Flawless Consulting
