*Ceramic to Clay* Sharon Dzialo 2010-10 "There is some brain activity," the neurologist stated somberly. A near-drowning upended the life of 12 year old Adam Dzialo. Three weeks on a ventilator, six weeks in a rehab hospital, and then home. The previously healthy, vibrant boy returned to his family, rigid as a board, nonverbal, tube-fed, and severely traumatized. He would scream without sound and cry without tears. Doctors, nurses, aides, and therapists surrounded Adam, offering surgery, medication, and speech, occupational and physical therapy. Sharon, his mother, wanted the experts to fix her son. This led to nothing but disappointment, fear, and frustration. Then Sharon met a clairvoyant who kindly informed her that Adam's spirit was not in his body but hovering in a corner in his room. This woman then guided the Dzialo family to open their hearts and minds to a gentler and deeper approach to Adam's recovery. Sharon Dzialo has worked

professionally as a high school teacher and counselor. She is married and the mother of two children. Since the day of her son's accident, Sharon has assumed the roles of a student of trauma and an extreme caregiver.

Understanding the nature of healing emerged as her critical life task. It has been a journey fraught with the unimaginable.

**Wireless Sensor Networks** Jorge Sá Silva  
2010-02-05 It is our great pleasure to present the proceedings of the European Conference on Wireless Sensor Networks 2010 (EWSN 2010). As the field of wireless sensor networks matures, new design concepts, experim- tal and theoretical findings, and applications have

continued to emerge at a rapid pace. As one of the leading international conferences in this area, EWSN has played a substantial role in the dissemination of innovative research ideas from researchers all over the globe. EWSN 2010 was organized by the University of Coimbra, Portugal, during February 17–19, 2010 and it was the seventh meeting in this series. Previous events were held in Berlin (Germany) in 2004, Istanbul (Turkey) in 2005, Zurich (Switzerland) in 2006, Delft (The Netherlands) in 2007, and Cork (Ireland) in 2009. A high-quality selection of papers made up EWSN 2010. Based on the reviews and the recommendations from the four live TPC discussions, we selected a total of 21 papers from 109 submissions (19.26% acceptance rate) for EWSN 2010. Topics of interest included hardware design and implementation, operating systems and software, middleware and macroprogramming, communication and network protocols, information and signal processing, fundamental

theoretical limits and algorithms, prototypes, field experiments, testbeds, novel applications, including urban sensing, security and fault-tolerance. Putting together EWSN 2010 was a team effort. We would like to thank the Program Committee members, the reviewers, our sponsors, all authors, and the Organizing Committee for their respective contributions.
