Literature Class, Berkeley 1980 Julio Cortázar

2017-03-28 A master class from the exhilarating writer Julio Cortázar "I want you to know that I'm not a critic or theorist, which means that in my work I look for solutions as problems arise." So begins the first of eight classes that the great Argentine writer Julio Cortázar delivered at UC Berkeley in 1980. These "classes" are as much reflections on Cortázar's own writing career as they are about literature and the historical moment in which he lived. Covering such topics as "the writer's path" ("while my aesthetic world view made me admire writers like Borges, I was able to open my eyes to the language of street slang, lunfardo...") and "the fantastic" ("unbeknownst to me, the fantastic had become as acceptable, as possible and real, as the fact of eating soup at eight o'clock in the evening"), Literature Class provides the warm and personal experience of sitting in a room with the great author. As Joaquin Marco stated in *El Cultural*, "exploring this course is to dive into Cortázar designing his own creations... Essential for anyone reading or studying Cortázar, cronopio or not!"

Doing Developmental Research Tricia Striano 2016-01-05

Addressing practical issues rarely covered in methods texts, this user-friendly, jargon-free book helps students and beginning researchers plan infant and child development studies and get them done. The author provides step-by-step guidance for getting involved in a developmental laboratory and crafting effective research questions and proposals. Tips on recruiting study participants cover access issues--such as how to overcome language and cultural barriers--and include helpful sample scripts. The book offers time management strategies, pointers for organizing and communicating data, and a roadmap of the journal publication process, complete with an annotated sample article. Numerous concrete examples, checklists, worksheets, and exercises are featured. Reproducible forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Pedagogical Features *Chapter subheadings written as questions to help students quickly find the answers they need. *Key tips and checklists for managing each phase of a study. *Exercises that build core research skills. *Annotated sample journal article with commentary on the writing and publication process.

Story of Love in Solitude Roger Lewinter 2016-10-25 A notable discovery of a truly original voice Several stories inhabit Roger Lewinter's first small book to appear in English, *Story of Love in Solitude*. Each story takes the form of a loop: a spider who won't stop returning; camellias that flourish and then die; dying parents whose presence is always yet felt; turning again and again to work on Rilke translations; a younger man whom the narrator sees each week at the Geneva street markets. All the tales touch on the possibility, the open possibility of love—a loop without end. Lewinter's short fictional works are at once prose poems and a form of dreaming; they are akin to the great French tradition of things sparking emotions and emotions sparking things—part Sarraute, part Robbe-Grillet, part Perec.

Plot is not really the point of his meditative works. Lewinter concerns himself more with perception, apperception, and sudden inflections of grace: loss and beauty meet in an explosion of joy, which becomes, "in its brilliance, a means of transmittal."

Biodiversity in Environmental Assessment Roel Sloopweg

2009-11-12 Human induced development activities are introduced with insufficient attention to their consequences for our living environment, even in cases where environmental assessments have been carried out. This apparent lack of attention to biodiversity in environmental assessment is rooted in the difficulties we have in adequately addressing biodiversity within the scope, time frame and budget allocated for assessments. This book provides a conceptual background and practical approaches to overcome these difficulties. It integrates the objectives of the Convention on Biological Diversity, its ecosystem approach, and the conceptual framework of the Millennium Ecosystem Assessment into a comprehensive approach to biodiversity in environmental assessment. It highlights the need to consider the value of biodiversity based on its use by each stakeholder, addresses the importance of both social and economic development to reach the Millennium Development Goals, and provides insights into ways to balance present and future needs.

A Season in Hell & The Drunken Boat (Second Edition)

Arthur Rimbaud 2011-10-05 A reissue of Rimbaud's highly influential work, with a new preface by Patti Smith and the original 1945 New Directions cover design by Alvin Lustig. New Directions is pleased to announce the relaunch of the long-celebrated bi-lingual edition of Rimbaud's *A Season In Hell & The Drunken Boat* – a personal poem of damnation as well as a plea to be released from "the examination of his own depths." Rimbaud originally distributed *A Season In Hell* to friends as a self-published booklet, and soon afterward, at the age of nineteen, quit poetry altogether. New Directions's edition was among the first to be published in the U.S., and it quickly became a classic. Rimbaud's famous poem "The Drunken Boat" was subsequently added to the first paperback printing. Allen Ginsberg proclaimed Arthur Rimbaud as "the first punk" – a visionary mentor to the Beats for both his recklessness and his fiery poetry. This new edition proudly dons the original Alvin Lustig-designed cover, and a introduction by another famous rebel – and now National Book Award-winner – Patti Smith.

Tell Them of Battles, Kings, and Elephants Mathias Énard

2019-10-29 Michelangelo's adventure in Constantinople, from the "mesmerizing" (*New Yorker*) and "masterful" (*Washington Post*) author of *Compass In 1506*, Michelangelo—a young but already renowned sculptor—is invited by the sultan of Constantinople to design a bridge over the Golden Horn. The sultan has offered, alongside an enormous payment, the promise of immortality, since Leonardo da Vinci's design has been rejected: "You will surpass him in glory if you accept, for you will succeed where he has failed, and you will

give the world a monument without equal." Michelangelo, after some hesitation, flees Rome and an irritated Pope Julius II—whose commission he leaves unfinished—and arrives in Constantinople for this truly epic project. Once there, he explores the beauty and wonder of the Ottoman Empire, sketching and describing his impressions along the way, as he struggles to create what could be his greatest architectural masterwork. *Tell Them of Battles, Kings, and Elephants*—constructed from real historical fragments—is a thrilling page-turner about why stories are told, why bridges are built, and how seemingly unmatched fragments, seen from the opposite sides of civilization, can mirror one another.

100 Activities for Teaching Research Methods Catherine Dawson 2016-08-08 A sourcebook of exercises, games, scenarios and role plays, this practical, user-friendly guide provides a complete and valuable resource for research methods tutors, teachers and lecturers. Developed to complement and enhance existing course materials, the 100 ready-to-use activities encourage innovative and engaging classroom practice in seven areas: finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills. Each of the activities is divided into a section on tutor notes and student handouts. Tutor notes contain clear guidance about the purpose, level and type of activity, along with a range of discussion notes that signpost key issues and research insights. Important terms, related activities and further reading suggestions are also included. Not only does the A4 format make the student handouts easy to photocopy, they are also available to download and print directly from the book's companion website for easy distribution in class.

On the High Wire Philippe Petit 2019-06-25 "On the High Wire is fascinating to read. You will learn about the man, his work, his passion, his tenacity and lucidity" (Marcel Marceau) In this poetic handbook, written when he was just twenty-three, the world-famous high-wire artist Philippe Petit offers a window into the world of his craft. Petit masterfully explains how preparation and self-control contributed to such feats as walking between the towers of Notre Dame and the World Trade Center. Addressing such topics as the rigging of the wire, the walker's first steps, his salute and exercises, and the work of other renowned high-wire artists, Petit offers us a book about the ecstasy of conquering our fears and reaching for the stars.

How to Teach a Course in Research Methods for Psychology Students Ross A. Seligman 2020-04-13 This book is a step-by-step guide for instructors on how to teach a psychology research methods course at the undergraduate or graduate level. It provides various approaches for teaching the course including lecture topics, difficult concepts for students, sample labs, test questions, syllabus guides and policies, as well as a detailed

description of the requirements for the final experimental paper. This book is also supplemented with anecdotes from the author's years of experience teaching research methods classes. Chapters in this book include information on how to deliver more effective lectures, issues you may encounter with students, examples of weekly labs, tips for teaching research methods online, and much more. This book is targeted towards the undergraduate or graduate professor who has either not yet taught research methods or who wants to improve his or her course. Using step by step directions, any teacher will be able to follow the guidelines found in this book that will help them succeed. *How to Teach a Course in Research Methods for Psychology Students* is a valuable resource for anyone teaching a quantitative research methods course at the college or university level.

Varamo César Aira 2012-02-22 The surprising, magnificent story of a Panamanian government employee who, one day, after a series of troubles, writes the celebrated masterwork of modern Central American poetry. Unmistakably the work of César Aira, *Varamo* is about the day in the life of a hapless government employee who, after wandering around all night after being paid by the Ministry in counterfeit money, eventually writes the most celebrated masterwork of modern Central American poetry, *The Song of the Virgin Boy*. What is odd is that, at fifty years old, Varamo "hadn't previously written one sole verse, nor had it ever occurred to him to write one." Among other things, this novella is an ironic allegory of the poet's vocation and inspiration, the subtlety of artistic genius, and our need to give literature an historic, national, psychological, and aesthetic context. But Aira goes further still – converting the ironic allegory into a formidable parody of the expectations that all narrative texts generate – by laying out the pathos of a man who between one night and the following morning is touched by genius. Once again Aira surprises us with his unclassifiable fiction: original and enjoyable, worthy of many a thoughtful chuckle, *Varamo* invites the reader to become an accomplice in the author's irresistible game.

Information Technology for Management. Ongoing Research and Development Ewa Ziemia 2018-02-27 This book constitutes extended selected papers from the 15th Conference on Advanced Information Technologies for Management, AITM 2017, and the 12th Conference on Information Systems Management, ISM 2017, held as part of the Federated Conference on Computer Science and Information Systems, FedCSIS, which took place in Prague, Poland, in September 2017. The 13 papers presented in this volume were carefully reviewed and selected from 48 submissions. They were organized in topical sections named: information technology and systems for knowledge management; information technology and systems for business transformation; and implementation and evaluation of information systems.

Gap Gardening: Selected Poems Rosmarie Waldrop 2016-04-19 An essential edition of a major avant-garde poet: "Waldrop compels us to seek out new superlatives" (Ben Lerner, Jacket) Rosmarie Waldrop says *Gap Gardening* "spans forty years of exploring the language I breathe and move in and that continues to condition me even while I try to contribute to it. It tracks my turn from verse to prose poems, to focusing on the sentence and its boundaries, my increasing reliance on collage and source texts as a way of engaging with other voices, of being in dialogue." *Gap Gardening* also traces Waldrop's growing sense of writing as an exploration of what happens in between. Between words, sentences, people, cultures. Between fragment and flow, thinking and feeling, mind and body. For the first time, we have a complete and clear view of the work of a great and

inquiring, brave and indispensable poet.

Computer Networks and Inventive Communication

Technologies S. Smys 2021-09-13 This book is a collection of peer-reviewed best-selected research papers presented at 4th International Conference on Computer Networks and Inventive Communication Technologies (ICCNCT 2021). The book covers new results in theory, methodology, and applications of computer networks and data communications. It includes original papers on computer networks, network protocols and wireless networks, data communication technologies, and network security. The proceedings of this conference are a valuable resource, dealing with both the important core and the specialized issues in the areas of next-generation wireless network design, control, and management, as well as in the areas of protection, assurance, and trust in information security practice. It is a reference for researchers, instructors, students, scientists, engineers, managers, and industry practitioners for advanced work in the area.

Transforming Scholarly Publishing With Blockchain

Technologies and AI Gunter, Darrell Wayne 2021-06-18 Every industry will be positively affected by blockchain and AI technology at some point. However, blockchain is a misunderstood technology within the publishing realm. The scholarly publishing industry can significantly improve the flow of research, drive down costs, and introduce new efficiencies in the publishing industry with these new technologies. The scholarly publishing industry is in its early days of the digital transformation, and blockchain and AI technology could play a major role in this. However, the industry has been resistant to change. These reasons include but are not limited to staying with legacy systems, cost of new platforms, changing cultures, and understanding and adopting new technologies. With proper research and information provided, the publishing industry can adopt these technologies for beneficial advancements and the generation of a bright future. Transforming Scholarly Publishing With Blockchain Technologies and AI explores the changing landscape of scholarly publishing and how blockchain technologies and AI are slowly being integrated and used within the industry. This book covers both the benefits and challenges of implementing technology and provides both cases and new developments. Topics highlighted include business model developments, new efficiencies in scholarly publishing, blockchain in research libraries, knowledge discovery, and blockchain in academic publishing. This book is a valuable reference tool for publishers, IT specialists, technologists, publishing vendors, researchers, academicians, and students who are interested in how blockchain technologies and AI are transforming and developing a modern scholarly publishing industry.

An Introduction to Systematic Reviews David Gough 2017-03-28 Focused on actively using systematic review as method, this book provides clear, step-by-step advice on the logic and processes of systematic reviewing. Stressing the importance of precision and accuracy, this new edition carefully balances a need for insightful theory with real-world pragmatism; it introduces a wide range of cutting-edge approaches to research synthesis including text mining, living reviews and new ideas in mixed methods reviews such as qualitative comparative analysis. The book also includes: A new chapter on statistical synthesis Coverage of computer-assisted methods and relevant software Expanded sections on data extraction and management A guide to working with many different types of data including longitudinal and panel. Packed with examples from across the social sciences, this book helps students and researchers alike in turning systematic reviews into recommendations for policy and practice.

Empathy Mei-Mei Berssenbrugge 2020-02-25 The groundbreaking poetic work by our "Mondrian in verse" (Susan Barba, Boston Review), now back in print in a newly revised edition with a new preface by the author. Empathy, first published by Station Hill Press in 1989, marked a turning point in Mei-mei Berssenbrugge's poetry, her lines lengthening across the page like so many horizons, tuned intimately to the natural world and its human relations, at once philosophical, lush, and rhythmic. As she writes in the new note for this edition, "I started to feel my way toward an intuited subliminal wholeness of composition." In these poems, empathy not only becomes the space of one person inside another, but of one element (water, or fog), one place (tundra or desert mesa), one animal (the swan) as the locus of human illumination and desire.

Pseudoscience Allison B. Kaufman 2018-02-02 Case studies, personal accounts, and analysis show how to recognize and combat pseudoscience in a post-truth world. In a post-truth, fake news world, we are

particularly susceptible to the claims of pseudoscience. When emotions and opinions are more widely disseminated than scientific findings, and self-proclaimed experts get their expertise from Google, how can the average person distinguish real science from fake? This book examines pseudoscience from a variety of perspectives, through case studies, analysis, and personal accounts that show how to recognize pseudoscience, why it is so widely accepted, and how to advocate for real science. Contributors examine the basics of pseudoscience, including issues of cognitive bias; the costs of pseudoscience, with accounts of naturopathy and logical fallacies in the anti-vaccination movement; perceptions of scientific soundness; the mainstream presence of “integrative medicine,” hypnosis, and parapsychology; and the use of case studies and new media in science advocacy. Contributors David Ball, Paul Joseph Barnett, Jeffrey Beall, Mark Benisz, Fernando Blanco, Ron Dumont, Stacy Ellenberg, Kevin M. Folta, Christopher French, Ashwin Gautam, Dennis M. Gorman, David H. Gorski, David K. Hecht, Britt Marie Hermes, Clyde F. Herreid, Jonathan Howard, Seth C. Kalichman, Leif Edward Ottesen Kennair, Arnold Kozak, Scott O. Lilienfeld, Emilio Lobato, Steven Lynn, Adam Marcus, Helena Matute, Ivan Oransky, Chad Orzel, Dorit Reiss, Ellen Beate Hansen Sandseter, Kavin Senapathy, Dean Keith Simonton, Indre Viskontas, John O. A Breath of Life Clarice Lispector 2012-06-13 A mystical dialogue between a male author and his creation, this posthumous work has never before been translated, and is a book of particular beauty and strangeness. A mystical dialogue between a male author (a thinly disguised Clarice Lispector) and his/her creation, a woman named Angela, this posthumous work has never before been translated. Lispector did not even live to see it published. At her death, a mountain of fragments remained to be “structured” by Olga Borelli. These fragments form a dialogue between a god-like author who infuses the breath of life into his creation: the speaking, breathing, dying creation herself, Angela Pralini. The work’s almost occult appeal arises from the perception that if Angela dies, Clarice will have to die as well. And she did.

Dog Symphony Sam Munson 2018-08-28 A breakthrough novel from the acclaimed young American writer Boris Leonidovich, a North American professor who specializes in the history of prison architecture, has been invited to Buenos Aires for an academic conference. He’s planning to present a paper on Moscow’s feared Butyrka prison, but most of all he’s looking forward to seeing his enigmatic, fiercely intelligent colleague (and sometime lover) Ana again. As soon as Boris arrives, however, he encounters obstacle after unlikely obstacle: he can’t get in touch with Ana, he locks himself out of his rented room, and he discovers dog-feeding stations and water bowls set before every house and business. With night approaching, he finds himself lost and alone in a foreign city filled with stray dogs, all flowing with sinister, bewildering purpose though the darkness... Shadowed with foreboding, and yet alive with the comical mischief of César Aira and the nimble touch of a great stylist, *Dog Symphony* is an un-nerving and propulsive novel by a talented new American voice.

The Marvellous Equations of the Dread: A Novel in Bass Riddim Marcia Douglas 2018-07-31 The ancestors have awakened. Somebody has called them. The long-dead are stirring. Jah ways are mysterious ways. “Is me–Bob. Bob Marley.” Reincarnated as homeless Fall-down man, Bob Marley sleeps in a clock tower built on the site of a lynching in Half Way Tree, Kingston. The ghosts of Marcus Garvey and King Edward VII are there too, drinking whiskey and playing solitaire. No one sees that Fall-down is Bob Marley, no one but his long-ago love, the deaf woman, Leenah, and, in the way of this otherworldly book, when Bob steps into the street each

day, five years have passed. Jah ways are mysterious ways, from Kingston’s ghettos to London, from Haile Selassie’s Ethiopian palace and back to Jamaica, Marcia Douglas’s mythical reworking of three hundred years of violence is a ticket to the deep world of Rasta history. This amazing novel—in bass riddim—carries the reader on a voyage all the way to the gates of Zion.

The Governesses Anne Serre 2018-10-30 The sensational US debut of a major French writer—an intense, delicious meringue of a novella In a large country house shut off from the world by a gated garden, three young governesses responsible for the education of a group of little boys are preparing a party. The governesses, however, seem to spend more time running around in a state of frenzied desire than attending to the children’s education. One of their main activities is lying in wait for any passing stranger, and then throwing themselves on him like drunken Maenads. The rest of the time they drift about in a kind of sated, melancholy calm, spied upon by an old man in the house opposite, who watches their goings-on through a telescope. As they hang paper lanterns and prepare for the ball in their own honor, and in honor of the little boys rolling hoops on the lawn, much is mysterious: one reviewer wrote of the book’s “deceptively simple words and phrasing, the transparency of which works like a mirror reflecting back on the reader.” Written with the elegance of old French fables, the dark sensuality of Djuna Barnes and the subtle comedy of Robert Walser, this semi-deranged erotic fairy tale introduces American readers to the marvelous Anne Serre.

Understanding and Evaluating Research Sue L. T. McGregor 2017-10-25 *Understanding and Evaluating Research: A Critical Guide* shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

The Oxford Handbook of the Economics of Networks Yann Bramoullé 2016-03-01 *The Oxford Handbook of the Economics of Networks* represents the frontier of research into how and why networks they form, how they influence behavior, how they help govern outcomes in an interactive world, and how they shape collective decision making, opinion formation, and diffusion dynamics. From a methodological perspective, the contributors to this volume devote attention to theory, field experiments, laboratory experiments, and econometrics. Theoretical work in network formation, games played on networks, repeated games, and the interaction between linking and behavior is synthesized. A number of chapters are devoted to studying social process mediated by networks. Topics here include opinion formation, diffusion of information and disease, and learning. There are also chapters devoted to financial contagion and systemic risk, motivated in part by the recent financial crises. Another section discusses communities, with applications including social trust, favor exchange, and social collateral; the importance of communities for migration patterns; and the role that networks and communities play in the labor market. A prominent role of networks, from an economic perspective, is that they mediate trade. Several chapters cover bilateral trade in networks, strategic intermediation, and the role of networks in international trade. Contributions discuss as well the role of networks for organizations. On the one hand, one

chapter discusses the role of networks for the performance of organizations, while two other chapters discuss managing networks of consumers and pricing in the presence of network-based spillovers. Finally, the authors discuss the internet as a network with attention to the issue of net neutrality.

Shantytown César Aira 2013-11-20 At last, a noir novel from the Argentine master of suspense and surprises Maxi, a middle-class, directionless ox of a young man who helps the trash pickers of Buenos Aires's shantytown, attracts the attention of a corrupt, trigger-happy policeman who will use anyone – including two innocent teenage girls – to break a drug ring that he believes is operating within the slum. A strange new drug, a brightly lit carousel of a slum, the kindness of strangers, gunplay... no matter how serious the subject matter, and despite Aira's "fascination with urban violence and the sinister underside of Latin American politics" (The Millions), Shantytown, like all of Aira's mesmerizing work, is filled with wonder and mad invention.
